JSX

- Neither string nor HTML

- JSX compiles to React.createElement()

- const element = <div className="App">Hello, world!</div>

- const element = {
  type: "div",
  props: {
    className: "App",
    children: "Hello, world!"
  }
}

Create first app

- npm init

- npm i create-react-app

- npx create-react-app 01
